

BURKE-ROCHE SPOILED TRIP, SAYS FORMER WIFE

His Former Wife, with Daugh-
ter, Warmly Welcomed
on Arrival Home.

MR. BOSTOCK ON SHIP,

Animal Trainer and Englishmen
Come to Settle Boundary Dispute
Passengers on Kaiser Wilhelm.

Observers of happenings on the North German Lloyd pier to-day upon the arrival in port of the Kaiser Wilhelm der Grosse were perhaps excusable in assuming that an engagement of marriage exists between Miss Cynthia Bone the tall and charming daughter of Mrs. Burke-Roche, and I. Townsend Bostock, Jr. Mrs. Burke-Roche and her daughter returned on the ship from a flying trip to Europe, and young Mr. Bostock met them on the pier.

He kissed Mrs. Burke-Roche and Miss Cynthia with every evidence of affection, although but a moment before Miss Cynthia had denied that she knew him. She refused to admit that she was engaged.

"Our trip to Europe would have been enjoyable," said Mrs. Roche, "but for the action of my former husband, Burke-Roche, in placing an advertisement in the Paris newspapers stating that he would not pay my debts. He never did pay my debts, even when I was married to him. Everybody who knew the circumstances saw through his object."

"Did you see your husband in Paris?" she was asked.

"No, indeed," was the reply. "I could not see him save by accident, and no such accident occurred."

That the recent estrangement between Mrs. Burke-Roche and her father, the venerable Frank Work, has been patched up and forgotten was apparent from her going to his house with her daughter. She spoke affectionately of her father. It was their dispute about finances that prompted Burke-Roche to print his advertisement in Paris.

Two of the distinguished passengers on the Kaiser Wilhelm der Grosse, which arrived to-day, were Arthur J. Chivers, of London, F. R. G. S., and Major P. H. Pawcet, of the British Army, who is on a special furlough for three years. These gentlemen have been chosen from the Royal Geographical Society to represent the South American Republic of Bolivia in her boundary line dispute with Brazil. The line between these two republics has been a matter upon which the governments have been unable to agree. Major Pawcet and Mr. Chivers will proceed to La Paz, Bolivia, where they will meet the representatives of Brazil and begin the work of establishing a boundary line satisfactory to both governments.

Mr. Chivers, by the way, is a loyal monarchist. He has no use for republics. He recalled to-day that in 1899, near San Juan d'Arcos, in South America, a Standard established a republic that lasted for ten minutes.

"That's the way all the republics will go in time," said Mr. Chivers. Frank Bostock returned from Paris to re-establish his big animal show at Coney Island. He brought with him a new lion tamer, Gallard, who has a sensational act to replace that of Bonavita.

It is surprising to me that they didn't have trouble in Paris on May 1," said Mr. Bostock. "All that prevented it was the precaution of practically placing the city under military control. Paris on May Day is not ordinarily quiet, but a week ago yesterday

M'CARREN CALLS ON MAYOR AT CITY HALL

Senator Patrick H. McCarren dropped into the City Hall to-day, and his appearance created as much of a sensation as if he had been Charles F. Murphy. It was not so much his visit to the City Hall that caused comment as where he spent his time.

McCarren was closeted with the Mayor for over an hour. It is not likely that the Brooklyn Senator would call on the Mayor unless he was invited. The City Hall rumor foundry could see but one reason why the Mayor should send an invitation to call to Senator McCarren.

That reason has to do with the controversy between the Mayor and Comptroller Metz over control of the Franchise Board. In the Comptroller, backed up by Borough President Ahern and at least two other Borough Presidents wins out, the Mayor will be nothing more than a figurehead in the granting of franchises.

This condition Mayor McClellan desires to avoid. It is believed that he has arranged with McCarren to have Metz agree to a compromise in return for his influence with McCarren. It is said, will have something to say about the appointment of a new member of the Rapid Transit Commission.

No matter how much you pay for a suit, it never looks well if it doesn't hold its shape. The

"Stayright Front" that you'll find only in Moe Levy made clothes, is the secret of their wonderful shape-keeping qualities.

ARTHUR J. CHIVERS,
LOYAL MONARCHIST,
AGAINST REPUBLICS.

Arthur Chivers F.R.G.S.

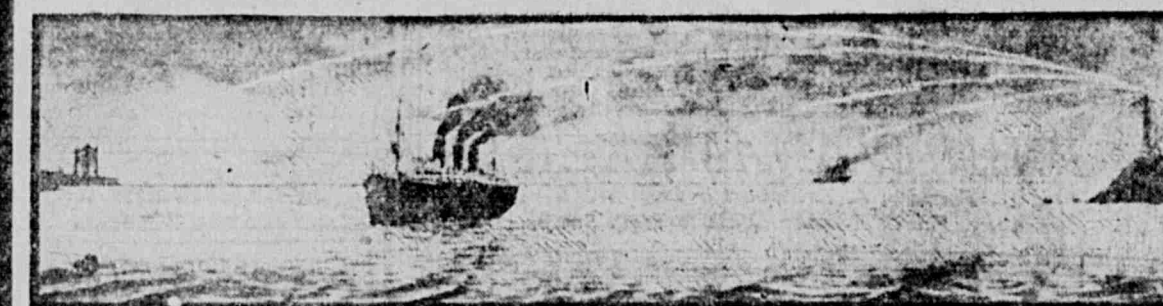

It was like a graveyard. There wasn't an automobile on the streets. On Monday morning at 4 o'clock the big liner ran into a fierce squall. A covering wave struck her port side aft and tore away part of the rail. The ship careened under the shock, and many of the passengers were spilled from their berths, but no one was injured.

MARCONI WIRELESS

**An Established, Operating Commercial Success.
THE BEST INVESTMENT IN THE WORLD
Now Earning Money Every Day and Hour.**

We have been continuously telling our customers and friends about Marconi securities. Every word we have said is coming true, and much more so did not venture to predict. The American people are now awake to the importance and usefulness of the MARCONI SYSTEM, and the demand for the securities has been unprecedented. It would take a book to tell you all about this greatest of all inventions. We print the main facts in our prospectus, and a good deal of additional information is contained in "THE MARCONI WIRELESS NEWS," both of which are free to you upon application. To those who are not familiar with the great progress that has been made by the Marconi Wireless Telegraph Company we publish below a few facts:

The Marconi System has the largest field to work of any enterprise in the world, being adapted to land and sea in every clime in every part of the earth's surface.

The business is on an established commercial basis, now earning money every day and hour. Its arrangements with the Western Union and Postal Telegraph Companies give it the use of their 30,000 offices, covering the United States and Canada, so that a message can be sent from and received in every town and hamlet.

Its officers and directors include men of the highest business standing and capacity, including John W. Crerar, President of the Company and former Governor of New Jersey and ex-Attorney-General of the United States, with a strong Board of Directors, and Thomas A. Edison, with other leading scientists, as Consulting Engineers.

The British Marconi Company, which was brought out previous to the American Marconi Wireless Telegraph Company, according to their annual statement, earned

SEVEN PER CENT. NET LAST YEAR,

a remarkable showing for a young company. The American Marconi Company, which is younger, has the advantage of all the English Company's expenditures and is growing rapidly, and with its much larger territory its earnings should be much greater.

IT IS NOW TO THE OCEAN WHAT THE BELL TELEPHONE IS ON LAND

and with many times a wider field of operation affords greater opportunity for advance in securities.

One hundred dollars originally invested in Bell Telephone stock now represents \$200,000 value.

The company is capitalized exceedingly low, has no Bonds or Preferred Stock, and its securities are based on the assets and contracts of the system in the United States and possessions and dependencies.

First in the field, based on the highest scientific principles and the widest experiments, and will always be FIRST, like the Bell Telephone.

Electric inventions have proved the most profitable of all investments, and the Marconi Wireless will ECLIPSE them all, as it does in utility and wisdom of field.

Its stockholders embrace the most conservative investors in America, including bankers, merchants, mechanics and professional men of all classes.

The Marconi System is now in daily operation between both sides of the Atlantic and transatlantic steamships and most war vessels at sea. These securities offer the greatest investment opportunity in the world, and will PAY THE

FOUNDATION OF YOUR FORTUNE.

Your chance for profit is in finding out that the investment is a good one before everybody else knows it. If Bell Telephone stock were offered now at the price it was sold to original investors it would not last a minute. \$100 invested in Bell Telephone stock in 25 years increased to over \$200,000. The only difference between the Bell Telephone opportunity you missed and the MARCONI opportunity you need NOW is in the nature of the investment. The time to buy Marconi securities is now.

Bel opportunity is one opportunity worth regretting. Marconi Wireless Telegraph is just as good to-day.

The New York "Sun," Jan. 28, 1906, says: "One thousand messages, commercial and personal, have been sent from one ship to others and to shore stations on one trip in the busy season. This means an expenditure by the passengers for Marconi Wireless messages of more than \$2,000. On a recent trip to New York from Hamburg the America sent 700 despatches to ship and shore."

Now is the time to buy Marconi securities. To-morrow may be too late. A big demand and an advance in price are at hand. Invest Before the Next Great Rise in These Securities and Reap the Benefit.

For full information concerning the wonderful Marconi System and for free illustrated pamphlet and copy of the latest edition of the Marconi Wireless News, address without delay, as below:
